

Exhibit 3
Adjacent Property 3D Images

memo

Date: June 24, 2021

To: Bois Blanc Township

From: Enbridge Energy, Limited Partnership ("Enbridge")

Re: **Enbridge Mackinac Straits Camera Installation Project – Exhibit 3 Adjacent Property 3D Images**

Holland Engineering provided 3D images of the ten properties adjacent to the Akright property. These images provide a vantage point of the proposed tower from ground level and at 100 feet above ground level at each property. The 3D images are included within Appendix A and the view-scapes of the ten adjacent properties show no visual impact of the proposed tower from the ground. Even at 100 feet above ground level, the visual impacts are minimal.

Holland Engineering also provided a 360-degree view of the proposed tower on the Akright property at 130 feet above ground level. These images are included within Appendix B and show that no adjacent property homes or dwellings can be viewed from this vantage point.

1. Preface

The following photos represent semi-realistic representations of the parcels immediately adjacent to Parcel 001-014-003-00, Akright . The following format is universal for all views for each property. The photo on the left is taken from Mackinac County GIS which shows the approximate outline of the parcel. The photo on the upper right is a ground level photo. In all photos, at ground level the tower is not visible. The right middle photo is a photo taken from the perspective of approximately 100' above the property. The photos on the lower right is take from 100' above the property, and zoomed in several times, similar to utilizing a pair of binoculars from that height.
